Asking price inflation rose to a solid 8.4% in Q4 2024

Welcome

The latest MyHome Property Price Report, in association with Bank of Ireland, for the final quarter of 2024 shows annual asking price inflation around the country has risen to 8.4%.

Once again it is the regions outside Dublin that are driving this growth, recording an annual inflation rate of almost 10%.

In our last report, we noted that Ireland would need an extra 200,000 homes to match the UK's housing to population ratio. This time, we have drawn a comparison with our neighbours on the demand side. At 36, first-time buyers here are older on average than those in the UK, who are 34. Irish first-time buyers are also now taking on more debt relative to income than their UK counterparts for the first time since the Celtic Tiger era.

With this additional debt, falling interest rates and a booming labour market, it stands to reason that demand has become fiercer during the year. Any stock that has come on the market has been snapped up,

and we now are close to a historic low in terms of the average time to sale agreed.

Meanwhile, the average residential transaction is being settled for 9% over the asking price.

A key metric to note as the year progresses will be housing completions. Our forecast of 33,000 completions for 2024 is on track, and we expect to see 42,000 in 2025, and 45,000 in 2026. Of course, we need to see a consistent increase in homes coming on to the market to help satisfy our surging demand.

As always, MyHome will continue to offer the most compelling insights into the market, and I hope you enjoy our latest report.

Joanne Geary
Managing Director, MyHome

Commentary

What should we expect in 2025?

This quarter's MyHome report shows asking price inflation accelerating to 8.4%. Meanwhile, in November we saw the average residential transaction being settled 9% above the original asking price. One-in-seven homes is being sold by 20% or more above the original asking price - typically set 5-6 months ago. Two-fifths of transactions are being settled at a premium exceeding 10%. The clear message is that despite stretched affordability pricing still has momentum heading into 2025.

Competition for homes remains intense. The average time-to-sale agreed is still close to a historic low of 3 months. In December, there were just 11,500 homes listed for sale on MyHome. So it shouldn't be a surprise that whatever homes are on estate agents books, are being snapped up ever more quickly, and at higher premia relative to asking prices.

Perhaps one feature of the housing market not fully appreciated is the role of household savings in driving up prices. New Central Bank data show the average first-time-buyer purchase price was €375,000 in H1 2024, up €21,000, or 6% on the year, two-thirds of which was accounted for by mortgage debt, but one-third (or €7,300) by larger deposits. Also, first-time-buyers are getting older, on average aged 36 years in H1 2024, up from 34 years in 2020 and vs 34 years in the UK.

The loosening of the Central Bank mortgage lending rules is also playing a role. The Central Bank had estimated this relaxation would gradually add 8% to house prices. This view is playing out. In H1 2024, the average first-time-buyer loan-to-income (LTI) ratio was 3.37x, well up from 3.25x in 2023, but below the 4.5x LTI median recorded in 2008. However, for the first time since the Celtic Tiger period Irish first-time-buyers are now taking out more leveraged loans than their UK counterparts.

Looking ahead to 2025 we expect another substantial mid-single digit rise in Irish house prices. Our current forecast is for 4%. However, if anything this view could be too conservative. Pay growth was 5.3% in Q3 2024. Hence, in October the average mortgage approval rose to a fresh record high of €321,000, up 8% on the year. This points to further house price gains in early 2025.

[Continued on next page](#) >>

One-in seven homes is being sold by 20% or more above the original asking price – typically set 5-6 months ago.

Housing starts rose close to 60,000 units in the twelve months to October.”

» ECB rate cuts will also support house prices in 2025. HICP inflation has returned from double-digit levels back close to the ECB’s 2% target. Hence, market expectations are that the ECB will cut rates aggressively next year.

The overnight index swap (OIS) curve implies the ECB’s deposit rate will fall from 3% currently to below 2% by end-2025. Current quoted fixed-term mortgage interest rates have already responded, falling to a range of 3-3.5% in December.

First-time-buyers in H1 2024 spent around 28% of their post-tax disposable incomes on their monthly mortgage payments, on average. Given the fall in interest rates that has already occurred this ratio will likely fall back to 25% or lower. However, with

First-time buyers in H1 2024 spent around 28% of their post-tax disposable incomes on their monthly mortgage payments.

Rise in first-time buyer purchase price in H1 2024 annually

Average age of a first-time buyer in Ireland in H1 2024

limited homes for sale, any initial improvement in affordability may be diluted by homebuyers bidding up house prices.

The outlook for housing completions next year is far more uncertain than for prices. Housing starts rose close to 60,000 units in the twelve months to October, but due to a rush of activity ahead of expected expirations of waivers on local authority and water infrastructure charges. When these starts eventually translate into final completions remains uncertain. For now, we are sticking with our forecast for 42,000 completions in 2025 and 46,000 in 2026.

Asking prices

MyHome asking price inflation 8.4% in final quarter of 2024

Asking price inflation outside of Dublin has risen to 10%

The latest MyHome report shows asking prices rose by 0.4% in Q4 2024, a modest gain during the usually quiet winter months. Nonetheless, this was still sufficient to push-up asking price inflation to 8.4% in Q4 2024, from 7.5% in Q3. However, in Dublin asking prices fell slightly on the quarter, so annual inflation fell back slightly to 5.9%, its softest pace in twelve months. In the rest of Ireland, asking price inflation accelerated to 9.8%, the sharpest pace in two-and-a-half years.

Of course, the official CSO measure of RPPI inflation was 10% in September, above our measure of asking price inflation. This reflects that homebuyers have been paying ever higher premia, over and above the original asking price, so that transaction prices have seen even sharper gains. The message from the Q4 asking price data is that pricing has retained some momentum, and has still not softened even as affordability has become stretched through 2024.

Dublin	€450,000	-0.1%	5.9%

Figure 2. MyHome asking price, new listings and mix-adjusted changes

Source: MyHome

Homebuyers still bidding up prices well above asking

In November, the median residential property transaction was settled 7.4% above the original asking price. Again, this is a fresh high, indicating the degree of competition in the housing market is even more intense than during the summer of 2022. In Dublin, the median property transaction in November was 8.6% above the asking price.

Consistent with the 'hot' market only one-in-six (17%) of transactions were settled at discount to the asking price in November, whereas a remarkable 40% were sold at a premium exceeding 10% of the asking price. One-in-seven

homes (15%) is still being sold at a premium to the asking price exceeding 20%.

We believe that measuring how transactions prices are being settled relative to the original asking price provides a useful gauge of housing market conditions. Over time, competition has heated up. In January, the median premium was 4.6%, well below the 7.4% recorded in November. It is also the reason the CSO's RRPI measure, accelerating to 10% in September, has exceeded asking price inflation.

	Q1	Q2	Q3	Q4
Discount	25%	24%	19%	18%
> 10%	6%	7%	5%	5%
> 5%	12%	13%	10%	9%

Housing market availability still exceptionally challenging for homebuyers

The Irish housing market is clearly exceptionally tight. The average time to sale agreed was just three months in Q4, still close to a historic low. Whatever stock is available for sale on estate agents' books is being sold ever more quickly.

Also, there were just 11,500 homes listed for sale on MyHome in December, down 1.4% on the year, and from levels above 20,000 pre-pandemic. However, the winter is the usual low-point of the year for stock levels, after the busy summer trading season. Some improvement in housing availability will likely occur in early 2025.

However, there are some modest signs of improvement. There were 6,400 new homes listed for sale in the first nine weeks of Q4 2024, up 8% on the same period of 2023. Of course, the acid test will come in the spring of 2025, as new listings tend to start to accelerate ahead of next summer.

It is worth remembering that while the market is very tight, overall transactional activity remains close to its highest level since the Celtic Tiger era. The tight market reflects that any improvement in supply has been met by demand. We expect

total residential transaction volumes in 2024 will be close to 62,500, down slightly from 63,300 in 2023. The Property Price Register (PPR) shows that so far in 2024, €21.7bn of residential transactions, or 51,657, have been recorded, or €420,000 on average.

Figure 5 Irish Residential Property Market Transactions

Source: Property Price Register

Mortgage market developments point to upward pressure on prices

The average mortgage loan for house purchase was €308,200 in Q3 2024, exceeding €300,000 for the first time and up 7% on the year. The latest October mortgage approvals data indicate that the process of homebuyers taking on higher levels of debt will put further upward pressure on house prices in 2025. The average mortgage approval for a house purchase in October was €321,200, up 7.9% on the year.

New Central Bank data suggest savings and deposits played a significant role in the sharp

6%, or €21,000 rise in the average first-time-buyer purchase price to €375,000 in H1 2024. The average loan saw a smaller €13,800 rise to €295,000. First-time-buyers are also taking on more leveraged loans, an average LTI was 3.37x in H1 2024 vs 3.25x in H1 2023. This follows the loosening of the Central Bank of Ireland mortgage lending rules, and reflects greater numbers of borrowers just below 4x threshold. Finally, the average first-time-buyer age is now 36 years vs 34 up to 2020 and in the UK.

	Ireland		UK
	H1 2023	H1 2024	H1 2024
Loan Size (€)	€281,106	€294,909	€204,480

The average first-time buyer age is now 36 years vs 34 up to 2020 and in the UK.

Rent price inflation continues to moderate

The Central Statistics Offices' private index rose by 0.4% in October, up 4.8% on the year. Whilst substantial this pace is below the high single-digit levels seen over the past decade and below pay growth of 5.6% in Q2 2024. It is also clearly below house price inflation, pointing to further downward pressure on rental yields.

The Residential Tenancies Board (RTB) measure also indicates that rental price inflation for new tenancies has cooled off, falling to 4.7% in Q2 2024, the softest pace in three-years. This slowdown is clearly concentrated in the capital. In Dublin rents were up only 2.5% on the year, but by 8.9% in the rest of Ireland.

The standardised average rent was €1,644 per month nationally, €2,147 in Dublin and €1,331 in the rest of Ireland. For renewals of existing tenancies the average rent was €1,415, up 5.8% on the year. This also illustrates the two-tier rental market due to rent controls, the average new tenancy 16% higher than the €1,415 for renewals.

It is worth noting that there were 12,000 new rental tenancies recorded in Q2 2024, down 8.5% on the year, but still indicating that the rental market is more liquid than some commentators have suggested, based on unreliable measures of the rental stock publicly advertised as available to rent.

Housing completions should pick-up rapidly in 2025

Housing completions in Q3 2024 were up 6% on the year to 8,900. The annual total in the twelve months to September was 31,900. So our forecast for 33,000 completions in 2024 is on track.

Notably, completions of scheme houses were 4,489 in Q3 2024, up 23% on the year, whereas for single-homes (-5%) and apartments (-7%), both down on the year.

in the existing homes market. There were 17,381 mortgages drawn down in the first nine months for the purchase of existing homes, down 7% on the year.

Looking ahead to 2025, the outlook is extremely uncertain. The expiry of a waiver on water infrastructure charges led to a secondary rush of housing commencements in September and October. Remarkably, in the twelve months to October the figures suggest construction began on almost 60,000 units. However, it remains to be seen when these starts will come to fruition. For now, we are sticking with our forecast for 42,000 completions next year, rising to 45,000 in 2026.

Housing completions are helping availability. In the first nine months of 2024 there were 7,844 mortgages drawn down for the purchase of newly built homes, up 7% on the year. Rather, the recent squeeze on availability has reflected weak liquidity

In the first nine months of 2024 there were 7,844 mortgages drawn down for the purchase of newly built homes, up 7% on the year.

Property Price Register Analysis

The Property Price Register (PPR) indicates that so far €21.7bn, or 51,657 residential transactions have been recorded in 2024. We estimate this means residential transaction volumes in the first nine months were down 5% on the year.

However, transactional activity has bounced back in October and November. We expect residential transactions should finish 2024 close to 62,500, down only slightly from 63,300 in 2023.

Dublin Analysis

Q4 Rates of inflation moderated to 5.9%

ANNUAL INFLATION DUBLIN CITY

12.4%

Q4 2024

PRICE GROWTH

8.4%

NEW INSTRUCTIONS Q4 2024

The CSO's RPPI index for Dublin rose by 0.9% in October 2024, with annual inflation running at 10.9%. This strong pace of house price inflation is broad based across the city; Dublin city (12.4%), Dun Laoghaire-Rathdown (8.9%), Fingal (13.5%), South Dublin (11.3%). Clearly, the official data on transaction prices show little sign of any material slowdown thus far, despite stretched affordability.

However, our MyHome asking price data for the capital show the rate of inflation moderated to 5.9% in Q4 2024. This could be the first sign of a more moderate pace of price increase to come in 2025. In Q4 2024 the median asking price in Dublin was €450,000, up 8.4% on the year.

Report Methodology

The trends presented in this report are based on actual asking prices of properties advertised on MyHome with comparisons by quarter over the last eight years.

This represents the majority of properties for sale in Ireland from leading estate agents nationwide. The series of data in this report has been produced using a combination of statistical techniques.

Our data is collected from quarterly snapshots of active, available properties on MyHome. Our main indices have been constructed with a widely-used regression technique which adjusts for change in the mixture of properties for sale in each quarter. Since the supply of property in each quarter has different combination of types, sizes and

locations, the real trends in property prices are easily obscured.

Our method is designed to reflect price changes independent of this variation in mix. For detailed statistics at a local level, we also provide a wide selection of median asking prices broken down by county or by urban location. For analysis of the Property Price Register, prices were adjusted upwards to account for VAT where necessary, and only full market value prices were used.

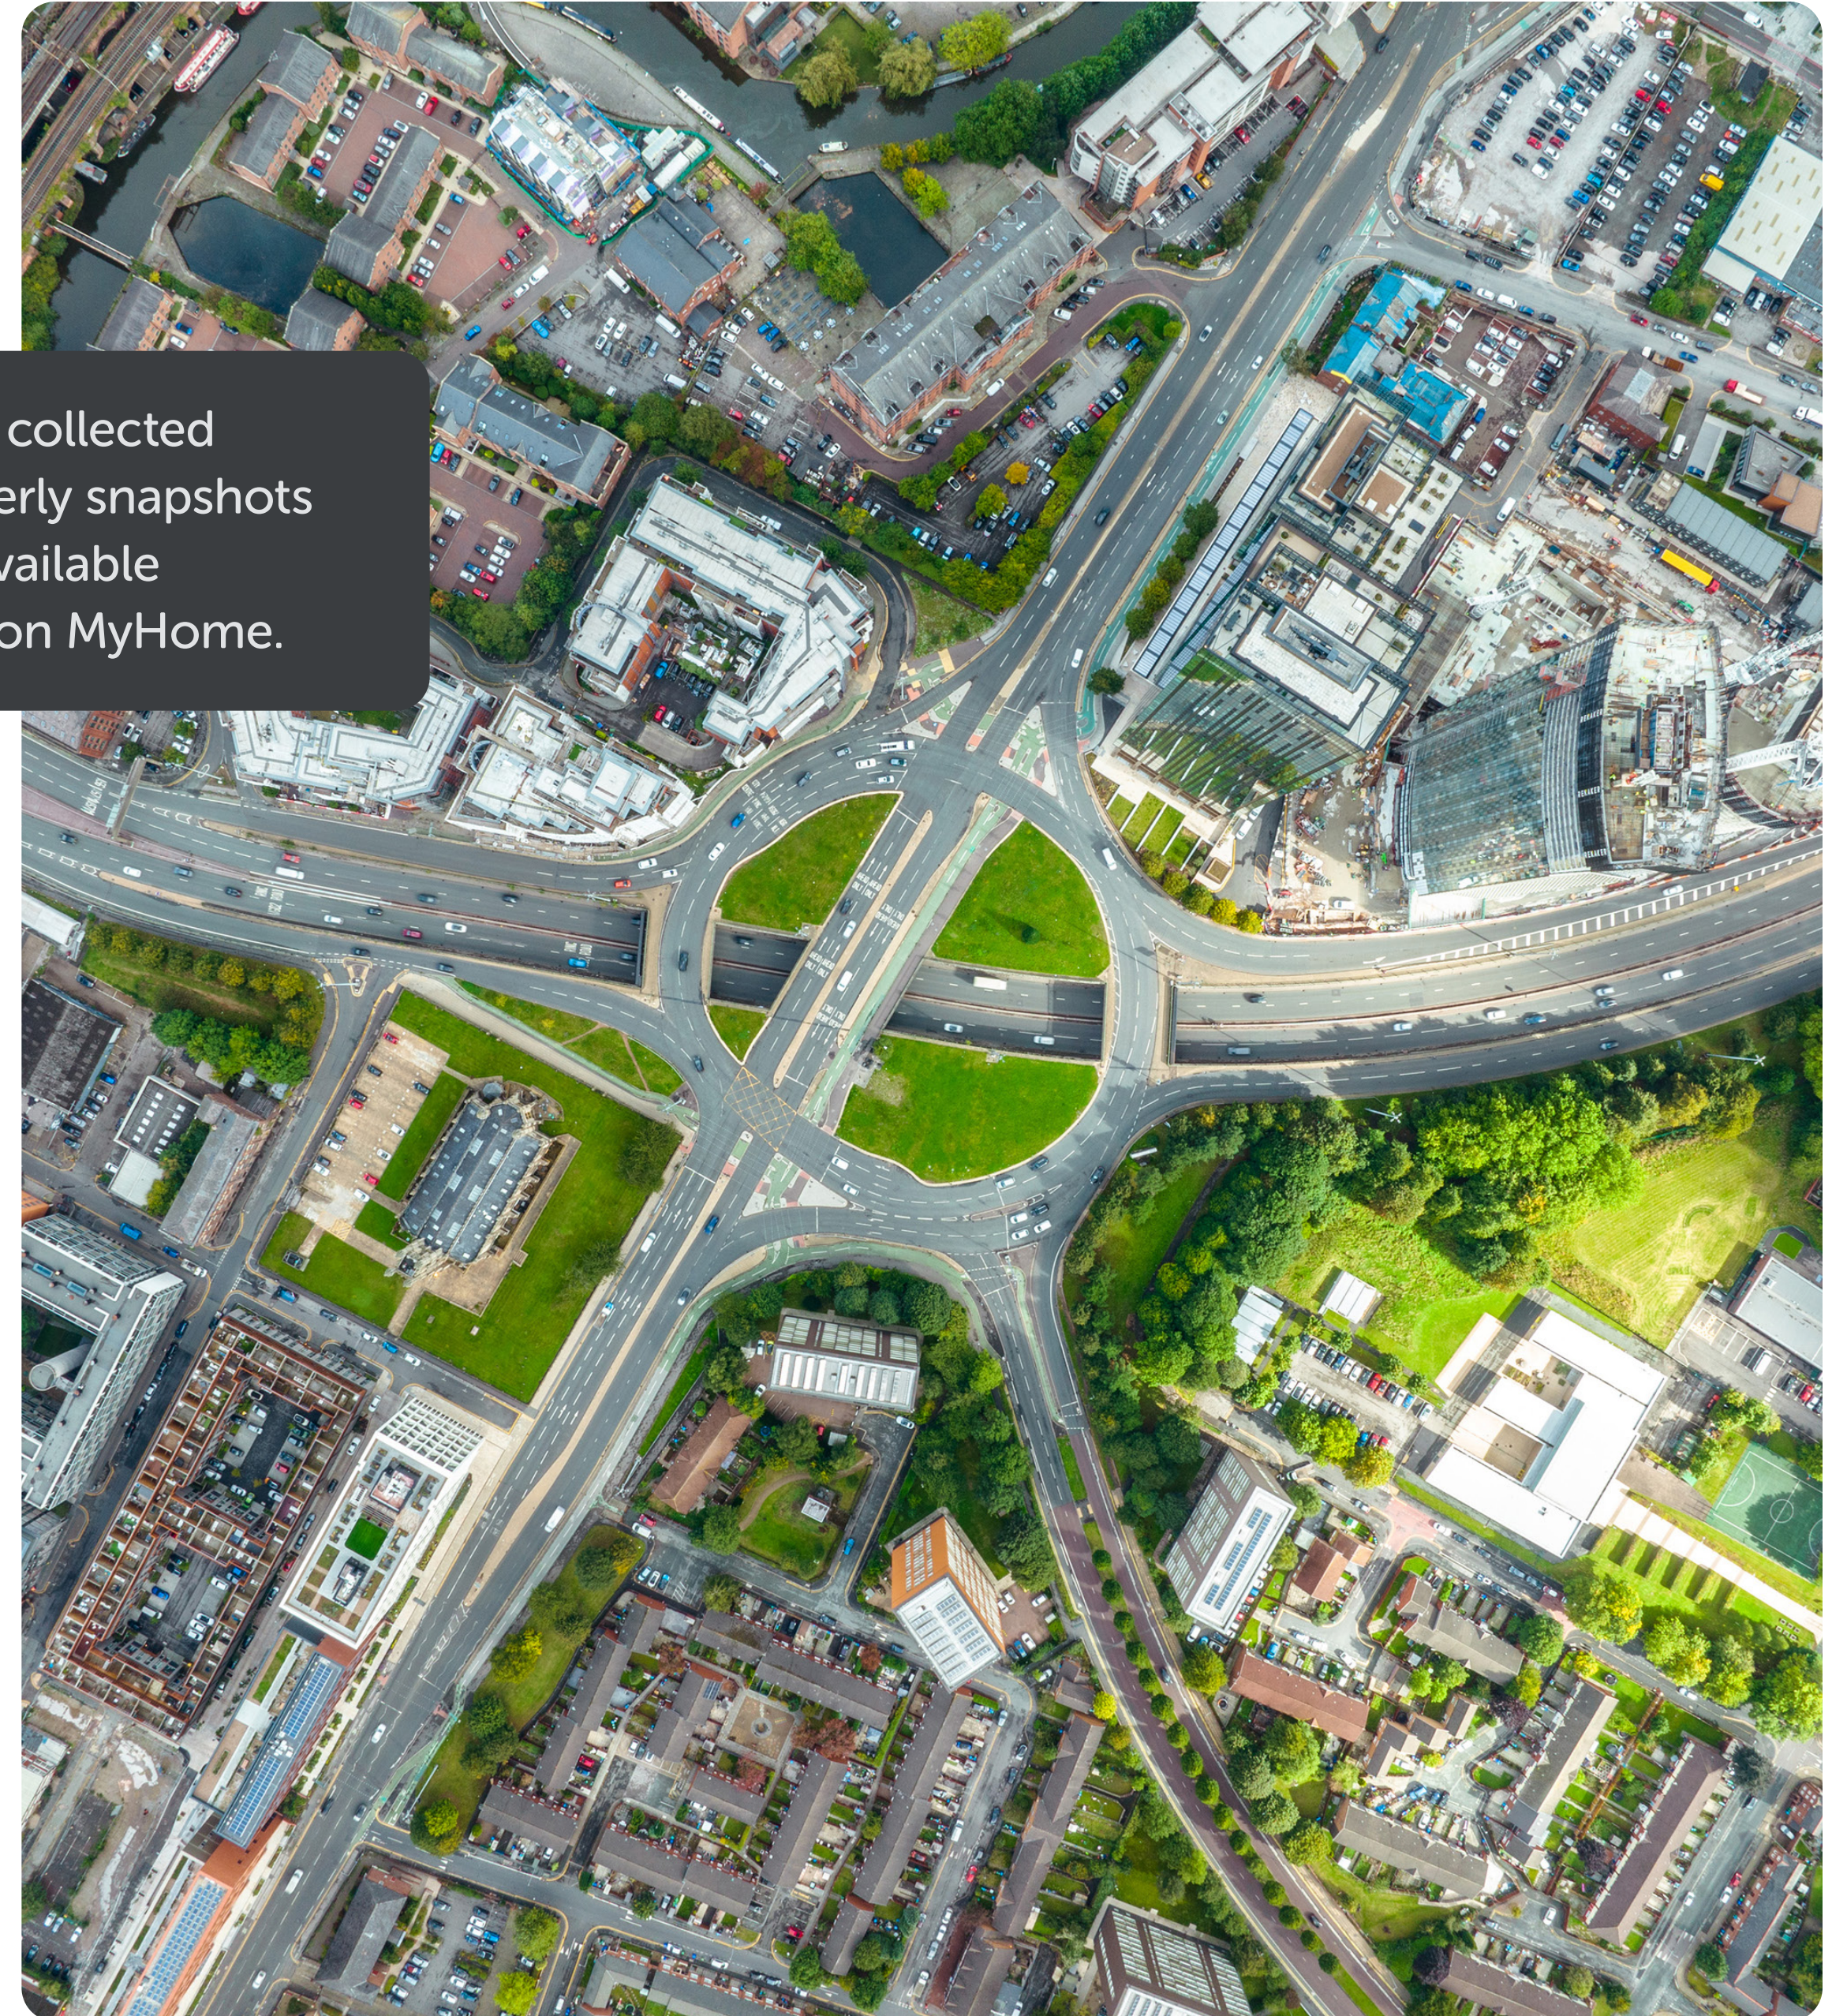

Our data is collected from quarterly snapshots of active, available properties on MyHome.

Graham is an independent financial analyst who specialises in investment consulting services. He previously managed portfolios for an international mutual organisation in London with over £14 billion in assets under management and one million members across Canada, the US and the UK. He has eight years of financial marketplace experience, holds a degree in mathematics from Trinity College Dublin, and is a CFA Charterholder (Chartered Financial Analyst).
